

BRAND PERFORMANCE CHECK

Buttonboss B.V.

PUBLICATION DATE: JUNE 2016

this report covers the evaluation period 01-01-2015 to 31-12-2015

ABOUT THE BRAND PERFORMANCE CHECK

Fair Wear Foundation believes that improving conditions for apparel factory workers requires change at many levels. Traditional efforts to improve conditions focus primarily on the factory. FWF, however, believes that the management decisions of clothing brands have an enormous influence for good or ill on factory conditions.

FWF's Brand Performance Check is a tool to evaluate and report on the activities of FWF's affiliate members. The Checks examine how affiliate management systems support FWF's Code of Labour Practices. They evaluate the parts of affiliate supply chains where clothing is assembled. This is the most labour intensive part of garment supply chains, and where brands can have the most influence over working conditions.

In most apparel supply chains, clothing brands do not own factories, and most factories work for many different brands. This means that in most cases FWF affiliates have influence, but not direct control, over working conditions. As a result, the Brand Performance Checks focus primarily on verifying the efforts of affiliates. Outcomes at the factory level are assessed via audits and complaint reports, however the complexity of the supply chains means that even the best efforts of FWF affiliates cannot guarantee results.

Even if outcomes at the factory level cannot be guaranteed, the importance of good management practices by affiliates cannot be understated. Even one concerned customer at a factory can have significant positive impacts on a range of issues like health and safety conditions or freedom of association. And if one customer at a factory can demonstrate that improvements are possible, other customers no longer have an excuse not to act. The development and sharing of these types of best practices has long been a core part of FWF's work.

The Brand Performance Check system is designed to accommodate the range of structures and strengths that different companies have, and reflects the different ways that brands can support better working conditions.

This report is based on interviews with affiliate employees who play important roles in the management of supply chains, and a variety of documentation sources, financial records, supplier data. The findings from the Brand Performance Check are summarized and published at www.fairwear.org. The online [Brand Performance Check Guide](#) provides more information about the indicators.

BRAND PERFORMANCE CHECK OVERVIEW

Buttonboss B.V.

Evaluation Period: 01-01-2015 to 31-12-2015

AFFILIATE INFORMATION	
Headquarters:	Enschede, Netherlands
Member since:	01-03-2006
Product types:	Promotional
Production in countries where FWF is active:	China
Production in other countries:	
BASIC REQUIREMENTS	
Workplan and projected production location data for upcoming year have been submitted?	Yes
Actual production location data for evaluation period was submitted?	Yes
Membership fee has been paid?	Yes
All suppliers have been notified of FWF membership?	Yes
SCORING OVERVIEW	
% of own production under monitoring	96%
Benchmarking score	70
Category	Good

Summary:

In 2015, Buttonboss met most of FWF's management system requirements. Its monitoring threshold of 90% meets FWF's requirements for members in 3+ years of membership. This, combined with a benchmarking score of 70, FWF has awarded a "Good" rating.

Buttonboss correctly followed up on suggestions made during last years' performance check. They organised a WEP training at their largest supplier and kept their monitoring threshold at the right level.

Even though Buttonboss has little leverage at its suppliers, FWF encourages Buttonboss to use their long-term relationship with its suppliers to discuss the topics of living wages and overtime.

PERFORMANCE CATEGORY OVERVIEW

Leader: This category is for affiliates who are doing exceptionally well, and are operating at an advanced level. Leaders show best practices in complex areas such as living wages and freedom of association.

Good: It is FWF's belief that affiliates who are making a serious effort to implement the Code of Labour Practices—the vast majority of FWF affiliates—are 'doing good' and deserve to be recognized as such. They are also doing more than the average clothing company, and have allowed their internal processes to be examined and publicly reported on by an independent NGO. The majority of affiliates will receive a 'Good' rating.

Needs Improvement: Affiliates are most likely to find themselves in this category when major unexpected problems have arisen, or if they are unable or unwilling to seriously work towards CoLP implementation. Affiliates may be in this category for one year only after which they should either move up to Good, or will be moved to suspended.

Suspended: Affiliates who either fail to meet one of the Basic Requirements, have had major internal changes which means membership must be put on hold for a maximum of one year, or have been in Needs Improvement for more than one year. Affiliates may remain in this category for one year maximum, after which termination proceedings will come into force.

Categories are calculated based on a combination of benchmarking score and the percentage of own production under monitoring. The specific requirements for each category are outlined in the Brand Performance Check Guide.

1. PURCHASING PRACTICES

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.1 Percentage of production volume from suppliers where affiliate buys at least 10% of production capacity	0%	Affiliates with less than 10% of a factories' production capacity generally have limited influence on factory managers to make changes.	Supplier information provided by affiliate.	0	4	0

Comment: Buttonboss sources at factories that are relatively large and therefore Buttonboss does not take up a significant proportion of their production capacity. This is a conscious decision to ensure the quality of the products Buttonboss produces.

1.2 Percentage of production volume from suppliers where a business relationship has existed for at least five years	40%	Stable business relationships support most aspects of the Code of Labour Practices, and give factories a reason to invest in improving working conditions.	Supplier information provided by affiliate.	2	4	0
--	-----	--	---	---	---	---

Comment: Buttonboss values long-term relationships with its suppliers.

1.3 All new suppliers are required to sign and return the Code of Labour Practices before first orders are placed.	No new suppliers	The CoLP is the foundation of all work between factories and brands, and the first step in developing a commitment to improvements.	Signed CoLPs are on file.	N/A	2	0
--	------------------	---	---------------------------	-----	---	---

Comment: No new suppliers were added in 2015.

1.4 Company conducts human rights due diligence at all new suppliers before placing orders.	No new suppliers	Due diligence helps to identify, prevent and mitigate potential human rights problems at new suppliers.	Documentation may include pre-audits, existing audits, other types of risk assessments.	N/A	4	0
---	------------------	---	---	-----	---	---

Comment: Before placing any orders, Buttonboss visits the factory and the actual production location to do a preliminary assessment of the factory and its working conditions. This visit is generally done by the director. During the introductory conversation, social compliance and FWF membership are discussed. If this visit is positive, Buttonboss requires the factory to complete a supplier information form and places a sample order to assess the quality, price and timeliness of the production. After this assessment, Buttonboss will provide more details on social compliance and FWF membership.

1.5 Supplier compliance with Code of Labour Practices is evaluated in a systematic manner.	Yes	A systemic approach is required to integrate social compliance into normal business processes, and supports good decisionmaking.	Documentation of systemic approach: rating systems, checklists, databases, etc.	1	2	0
--	-----	--	---	---	---	---

Recommendation: Buttonboss is encouraged to develop an evaluation/grading system for suppliers where compliance with labour standards is a criterion for future order placement. Part of the system can be to create an incentive for rewarding suppliers for realised improvements in working conditions.

Comment: At every visit compliance with the Code of Labour Practices is discussed.

1.6 The affiliate's production planning systems support reasonable working hours.	Strong, integrated systems in place.	Affiliate production planning systems can have a significant impact on the levels of excessive overtime at factories.	Documentation of robust planning systems.	4	4	0
---	--------------------------------------	---	---	---	---	---

Comment: Buttonboss knows the exact production time of their products. In the planning of the production process suppliers are given enough time to allow for reasonable working hours. Whenever there are delays in the process that may affect the lead-time Buttonboss discusses the possibilities with the factory, for example the possibility to first produce custom ordered products before producing stock ordered products.

1.7 Degree to which affiliate mitigates root causes of excessive overtime.	Intermediate efforts	Some production delays are outside of the control of affiliates; however there are a number of steps that can be taken to address production delays without resorting to excessive overtime.	Documentation of root cause analysis and positive steps taken to manage production delays or improve factory processes.	3	6	0
--	----------------------	--	---	---	---	---

Recommendation: Buttonboss could discuss with factory management the causes of excessive overtime and provide support to manage overtime. If necessary, the affiliate could hire local experts to analyse root cause of excessive overtime in cooperation with the supplier. FWF could recommend qualified persons upon request.

Comment: Buttonboss is aware of overtime with its suppliers, based on the audit reports. Within the production process, Buttonboss as much as possible eliminated ways in which they could contribute to excessive overtime. However, due to the limited leverage at its suppliers Buttonboss feels it is unable to address root causes of overtime at its suppliers.

1.8 Affiliate's pricing policy allows for payment of at least the legal minimum wages in production countries.	Style-level policy	The first step towards ensuring the payment of minimum wages - and towards implementation of living wages - is to know the labour costs of garments.	Formal systems to calculate labour costs on per-product or country/city level.	4	4	0
--	--------------------	--	--	---	---	---

Comment: Buttonboss knows how much time it takes to produce their products and is aware of the the legal minimum wages in China. This forms the basis for ensuring enough is paid to cover at least minimum wage.

1.9 Affiliate actively responds if suppliers fail to pay legal minimum wages.	No minimum wage problems reported	If a supplier fails to pay minimum wage, FWF affiliates are expected to hold management of the supplier accountable for respecting local labour law.	Complaint reports, CAPs, additional emails, FWF audit reports or other documents that show minimum wage issue is reported/resolved.	2	2	-2
---	-----------------------------------	--	---	---	---	----

1.10 Evidence of late payments to suppliers by affiliate.	No	Late payments to suppliers can have a negative impact on factories and their ability to pay workers on time. Most garment workers have minimal savings, and even a brief delay in payments can cause serious problems.	Based on a complaint or audit report; review of factory and affiliate financial documents.	0	0	-1
---	----	--	--	---	---	----

1.11 Degree to which affiliate assesses root causes of wages lower than living wages with suppliers and takes steps towards the implementation of living wages.	Basic approach	Sustained progress towards living wages requires adjustments to affiliates' policies.	Documentation of policy assessments and/or concrete progress towards living wages.	2	8	0
---	----------------	---	--	---	---	---

Requirement: Buttonboss is expected to take an active role in discussing living wages with its suppliers. The FWF wage ladder can be used as a tool to implement living wages. Most relevant wage estimates, such as local minimum wage, Asia Floor Wage, collective bargaining wage and industrial best practice wages are provided in the wage ladder. The wage ladder is included in FWF's audit reports. It demonstrates the gaps between workers' wages at a factory and living wages demanded by major stakeholders. The wage ladder can be used to document, monitor, negotiate and evaluate the improvements at its suppliers.

Comment: Two factors influence Buttonboss' limited assessment of root causes of wages lower than living wage. The first is the limited leverage at its suppliers and the second factor is the fact that Buttonboss is producing for the promotional market where margins are minimal.

1.12 Affiliate sources from an FWF factory member.	No	When possible, FWF encourages affiliates to source from FWF factory members. On account of the small number of factories this is a 'bonus' indicator. Extra points are possible, but the indicator will not negatively affect an affiliate's score.	Supplier information provided by affiliate.	N/A	1	0
--	----	---	---	-----	---	---

1.13 Percentage of production volume from factories owned by the affiliate.	None	Owning a supplier increases the accountability and reduces the risk of unexpected CoLP violations. Given these advantages, this is a bonus indicator. Extra points are possible, but the indicator will not negatively affect an affiliate's score.	Supplier information provided by affiliate.	N/A	2	0
---	------	---	---	-----	---	---

PURCHASING PRACTICES

Possible Points: 34

Earned Points: 18

2. MONITORING AND REMEDIATION

BASIC MEASUREMENTS	RESULT	COMMENTS
% of own production under standard monitoring (excluding low-risk countries)	96%	
% of own production in low risk production countries where FWF's Low Risk policy has been implemented	0%	FWF low risk policy should be implemented. 0 = policy is not implemented correctly. N/A = no production in low risk countries.
Total of own production under monitoring	96%	Minimums: 1 year: 40%; 2 years 60%; 3 years+: 90% Measured as a percentage of turnover.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.1 Specific staff person is designated to follow up on problems identified by monitoring system	Yes	Followup is a serious part of FWF membership, and cannot be successfully managed on an ad-hoc basis.	Manuals, emails, etc., demonstrating who the designated staff person is.	2	2	-2

Comment: Buttonboss has one person assigned to follow up on problems identified by the monitoring system. In 2016 this responsibility will be transferred to another person, who has more direct contact with the suppliers.

2.2 Degree of progress towards resolution of existing Corrective Action Plans	Intermediate	FWF considers efforts to resolve CAPs to be one of the most important things that affiliates can do towards improving working conditions.	Documentation of remediation and followup actions taken by affiliate.	4	8	-2
---	--------------	---	---	---	---	----

Comment: Two audits took place in 2013. In the meantime most issues from the CAP have been addressed. Buttonboss uses the file provided by FWF for follow-up and to track progress. In November 2015 another audit took place, the follow up of this audit will take place in 2016.

2.3 Percentage of production volume from suppliers that have been visited by the affiliate in the past financial year	96%	Formal audits should be augmented by annual visits by affiliate staff or local representatives. They reinforce to factory managers that affiliates are serious about implementing the Code of Labour Practices.	Affiliates should document all factory visits with at least the date and name of the visitor.	4	4	0
---	-----	---	---	---	---	---

Comment: Buttonboss visits aims to visit all suppliers annually. In 2015 they visited suppliers of 96% of their production volume.

2.4 Existing audit reports from other sources are collected.	Yes and quality assessed	Existing reports form a basis for understanding the issues and strengths of a supplier, and reduces duplicative work.	Audit reports are on file; evidence of followup on prior CAPs. Reports of quality assessments.	2	3	0
--	--------------------------	---	--	---	---	---

Recommendation: Existing reports form a basis for understanding the issues and strengths of a supplier, and reduces double work. Existing audits can be counted towards the monitoring threshold if the quality of the report is assessed using the FWF audit quality tool and corrective actions are implemented.

Comment: Audit reports from Sedex and BSCI are collected and the corrective action plan is used as input for discussions with the supplier. In 2016 Buttonboss will use the FWF audit quality assessment tool to assess the quality of the external audit reports.

2.5 Audit Report and Corrective Action Plan (CAP) findings are shared with factory. Improvement timelines are established in a timely manner	Yes	2 part indicator: FWF audit reports were shared and discussed with suppliers within two months of audit receipt AND a reasonable time frame was specified for resolving findings.	Corrective Action Plans, emails; findings of followup audits; brand representative present during audit exit meeting, etc.	2	2	-1
--	-----	---	--	---	---	----

2.6 High risk issues specific to the affiliate's supply chain are identified and addressed by the monitoring system.	Intermediate Capacity	Different countries and products have different risks associated with them; monitoring systems should be adapted to allow appropriate human rights due diligence for the specific risks in each affiliates' supply chain.	Documentation may take many forms; additional research, specific FWF project participation; extra monitoring activities, extra mitigation activities, etc.	3	6	0
--	-----------------------	---	--	---	---	---

Recommendation: Knowing the country specific risks facilitates the starting point for discussing this with suppliers. Buttonboss can agree on additional commitments that are required to mitigate risks. Buttonboss can provide additional measures for support and integrate that in the monitoring system. A structured approach should lead to higher score; if a brand has a system to investigate and address all suppliers that are subject to those risks.

Comment: Buttonboss sources only from China and has done so for a long time. Over the past years the company has gotten to know the country, its suppliers and the high-risk issues and acts accordingly. However, the approach is based on experience rather than a systematic approach.

2.6a High risk issues specific to Bangladesh are identified and adressed by the monitoring system and remediation activities.	Not sourcing in Bangladesh	Affiliates sourcing in Bangladesh should take additional action to address both building and fire safety and the prevention of violence against women.	Building, electrical and fire safety inspection reports, evidence of cooperation with other customers sourcing at the same factories (Accord signatories and/or FWF affiliates), etc.	N/A	3	0
---	----------------------------	--	---	-----	---	---

2.6b High risk issues specific to Myanmar are identified and addressed by the monitoring system and remediation activities.	Not sourcing in Myanmar	Myanmar is still in the process of establishing the legal and civil society infrastructure needed to ensure compliance with labour rights. Extra care must be taken when doing business in Myanmar.	Shared CAPs, Wage Ladders per factory.	N/A	3	0
---	-------------------------	---	--	-----	---	---

2.7 Affiliate cooperates with other customers in resolving corrective actions at shared suppliers	No CAPs active or no shared suppliers.	Cooperation between customers increases leverage and chances of successful outcomes. Cooperation also reduces the changes of a factory having to conduct multiple Corrective Action Plans about the same issue with multiple customers.	Shared CAPs, evidence of cooperation with other customers.	N/A	2	-1
---	--	---	--	-----	---	----

Comment: No shared suppliers.

2.8 Monitoring requirements are fulfilled for production in low-risk countries	No production in lowrisk countries	Low risk countries are determined by the presence and proper functioning of institutions which can guarantee compliance with basic standards.	Documentation of visits, notification of suppliers of FWF membership; posting of worker information sheets, completed questionnaires.	N/A	2	0
--	------------------------------------	---	---	-----	---	---

Comment: Buttonboss does not produce in low-risk countries.

2.9 External brands resold by the affiliate who have completed and returned the external brand questionnaire. (% of external sales volume)	No external brands resold	FWF believes it is important for affiliates that have a retail/wholesale arm to at least know if the brands they resell are members of FWF or a similar organisation, and in which countries those brands produce goods.	Questionnaires are on file.	N/A	3	0
--	---------------------------	--	-----------------------------	-----	---	---

2.10 External brands resold by affiliates that are members of another credible initiative. (% of external sales volume)	No external brands resold	FWF believes affiliates who resell products should be rewarded for choosing to stock external brands who also take their supply chain responsibilities seriously.	External production data in FWF's information management system. Documentation of sales volumes of products made by FWF or FLA members.	N/A	3	0
---	---------------------------	---	---	-----	---	---

MONITORING AND REMEDIATION

Possible Points: 25

Earned Points: 17

3. COMPLAINTS HANDLING

BASIC MEASUREMENTS	RESULT	COMMENTS
Number of worker complaints received since last check	0	At this point, FWF considers a high number of complaints as a positive indicator, as it shows that workers are aware of and making use of the complaints system.
Number of worker complaints in process of being resolved	0	
Number of worker complaints resolved since last check	0	

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
3.1 A specific employee has been designated to address worker complaints	Yes	Followup is a serious part of FWF membership, and cannot be successfully managed on an ad-hoc basis.	Manuals, emails, etc., demonstrating who the designated staff person is.	1	1	-1

Comment: The same person responsible for follow-up on problems identified by the monitoring system handles the complaints.

3.2 System exists to check that the Worker Information Sheet is posted in factories	Yes	The Worker Information Sheet is a key first step in alerting workers to their rights.	Photos by company staff, audit reports, checklists from factory visits, etc.	2	2	0
---	-----	---	--	---	---	---

Comment: At every visit the presence of the worker information sheet is checked.

3.3 Percentage of FWF-audited factories where at least half of workers are aware of the FWF worker helpline.	75%	The FWF complaints procedure is a crucial element of verification. If factory-based complaint systems do not exist or do not work, the FWF worker helpline allows workers to ask questions about their rights and file complaints. Factory participation in the Workplace Education Programme also count towards this indicator.	Percentage of audited factories where at least 50% of interviewed workers indicate awareness of the FWF complaints mechanism + percentage of factories in WEP programme.	4	4	-2
--	-----	--	--	---	---	----

Comment: In 2015, at least half of workers were aware of the FWF worker helpline in 75% of the FWF-audited factories.

3.4 All complaints received from factory workers are addressed in accordance with the FWF Complaints Procedure	No complaints received	Providing access to remedy when problems arise is a key element of responsible supply chain management. Affiliate involvement is often essential to resolving issues.	Documentation that affiliate has completed all required steps in the complaints handling process.	N/A	6	-2
--	------------------------	---	---	-----	---	----

3.5 Cooperation with other customers in addressing worker complaints at shared suppliers	No complaints or cooperation not possible / necessary.	Because most factories supply several customers with products, involvement of other customers by the FWF affiliate can be critical in resolving a complaint at a supplier.	Documentation of joint efforts, e.g. emails, sharing of complaint data, etc.	N/A	2	-2
--	--	--	--	-----	---	----

COMPLAINTS HANDLING

Possible Points: 7

Earned Points: 7

4. TRAINING AND CAPACITY BUILDING

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
4.1 All staff is made aware of FWF membership requirements	Yes	Preventing and remediating problems often requires the involvement of many different departments; making all staff aware of FWF membership requirements helps to support cross-departmental collaboration when needed.	Emails, trainings, presentation, newsletters, etc.	1	1	-1

Comment: The Buttonboss team is small and information on FWF membership requirements is shared regularly in an informal way.

4.2 Ongoing training in support of FWF requirements is provided to staff in direct contact with suppliers.	Yes	Sourcing, purchasing and CSR staff at a minimum should possess the knowledge necessary to implement FWF requirements and advocate for change within their organisations.	FWF Seminars or equivalent trainings provided; presentations, curricula, etc.	2	2	0
--	-----	--	---	---	---	---

Recommendation: A training session on labour standards can be held for purchasing staff. FWF can support or facilitate in providing trainings. In addition, it is recommended to actively take part in training opportunities FWF offers such as: FWF seminars, the FWF annual conference and webinars.

Comment: There are a few people within Buttonboss that are in direct contact with suppliers and they are provided with support of FWF requirements.

4.3 All sourcing contractors/agents are informed about FWF's Code of Labour Practices.	Affiliate does not use agents	Agents have the potential to either support or disrupt CoLP implementation. It is the responsibility of affiliate to ensure agents actively support the implementation of the CoLP.	Correspondence with agents, trainings for agents, FWF audit findings.	N/A	2	-2
--	-------------------------------	---	---	-----	---	----

Comment: Buttonboss stopped using their agent in 2015.

4.4 Factory participation in Workplace Education Programme (where WEP is offered; by production volume)	56%	Lack of knowledge and skills on best practices related to labour standards is a common issue in factories. Good quality training of workers and managers is a key step towards sustainable improvements.	Documentation of relevant trainings; participation in Workplace Education Programme.	6	6	0
---	-----	--	--	---	---	---

Comment: In 2015, Buttonboss organised a WEP training at its largest supplier.

4.5 Factory participation in trainings (where WEP is not offered; by production volume)	All production is in WEP areas.	In areas where the Workplace Education Programme is not yet offered, affiliates may arrange trainings on their own or work with other training-partners. Trainings must meet FWF quality standards to receive credit for this indicator.	Curricula, other documentation of training content, participation and outcomes.	N/A	4	0
---	---------------------------------	--	---	-----	---	---

TRAINING AND CAPACITY BUILDING

Possible Points: 9

Earned Points: 9

5. INFORMATION MANAGEMENT

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
5.1 Level of effort to identify all production locations	Intermediate	Any improvements to supply chains require affiliates to first know all of their production locations.	Supplier information provided by affiliate. Financial records of previous financial year. Documented efforts by affiliate to update supplier information from its monitoring activities.	3	6	-2

Comment: Buttonboss aims to visit each supplier every year and within the contract with Buttonboss suppliers are not allowed to use subcontractors. However, subcontractors are used in the production of some products. This is only discovered afterwards, because it often shows in quality. Due to the small leverage of Buttonboss they cannot always control whether subcontractors are use and have limited insight in when it happens.

5.2 A system exists to allow purchasing, CSR and other relevant staff to share information with each other about working conditions at suppliers	Yes	CSR, purchasing and other staff who interact with suppliers need to be able to share information in order to establish a coherent and effective strategy for improvements.	Internal information system; status CAPs, reports of meetings of purchasing/CSR; systematic way of storing information.	1	1	-1
--	-----	--	---	---	---	----

Comment: All information related to working conditions at suppliers is shared on a common server, accessible to all people dealing with suppliers.

INFORMATION MANAGEMENT

Possible Points: 7

Earned Points: 4

6. TRANSPARENCY

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
6.1 Communication about FWF membership adheres to the FWF communications policy	Yes	FWF membership should be communicated in a clear and accurate manner. FWF guidelines are designed to prevent misleading claims.	Logo is placed on website; other communications in line with policy. Affiliates may lose points if there is evidence that they did not comply with the communications policy.	1	1	-2

Comment: Buttonboss communicates about FWF on its Kingcap website and in its brochures. In line with the requirement of last year Buttonboss has stopped with on-garment communication.

6.2 Affiliate engages in advanced reporting activities	No	Good reporting by members helps to ensure the transparency of FWF's work and shares best practices with the industry.	Affiliate publishes one or more of the following on their website: Brand Performance Check, Audit Reports, Supplier List.	0	1	0
--	----	---	---	---	---	---

Recommendation: FWF recommends Buttonboss to publish one or more of the following reports on its website: brand performance check, audit reports, supplier information. Good reporting by members helps to ensure the transparency of Buttonboss' and FWF's work.

Comment: In 2015, Buttonboss did not engage in advanced reporting activities.

6.3 Social Report is submitted to FWF and is published on affiliate's website	Published on affiliate's website	The Social Report is an important tool for affiliates to transparently share their efforts with stakeholders.	Report adheres to FWF guidelines for Social Report content.	2	2	-2
---	----------------------------------	---	---	---	---	----

Comment: Social Report is published on the Kingcap website.

TRANSPARENCY

Possible Points: 4

Earned Points: 3

7. EVALUATION

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
7.1 Systemic annual evaluation of FWF membership is conducted with involvement of top management	Yes	An annual evaluation involving top management ensures that FWF policies are integrated into the structure of the company.	Meeting minutes, verbal reporting, Powerpoints, etc.	2	2	0
7.2 Changes from previous Brand Performance Check implemented by affiliate	100%	In each Brand Performance Check report, FWF may include requirements for changes to management practices. Progress on achieving these requirements is an important part of FWF membership and its process approach.	Affiliate should show documentation related to the specific requirements made in the previous Brand Performance Check.	4	4	-2

Comment: Buttonboss has adjusted its communication about FWF in line with the FWF communication policy.

EVALUATION

Possible Points: 6

Earned Points: 6

RECOMMENDATIONS TO FWF

Buttonboss believes the new brand performance check methodology does not fit their business model and is therefore not beneficial to them.

Buttonboss would like FWF to review the way it reports audit results and the corrective action plan (CAP) to give more insight in the priority of issues that need to be addressed.
