

BRAND PERFORMANCE CHECK

ROOTS for Safety B.V.

PUBLICATION DATE: SEPTEMBER 2017

this report covers the evaluation period 01-01-2016 to 31-12-2016

ABOUT THE BRAND PERFORMANCE CHECK

Fair Wear Foundation believes that improving conditions for apparel product location workers requires change at many levels. Traditional efforts to improve conditions focus primarily on the product location. FWF, however, believes that the management decisions of clothing brands have an enormous influence for good or ill on product location conditions.

FWF's Brand Performance Check is a tool to evaluate and report on the activities of FWF's member companies. The Checks examine how member company management systems support FWF's Code of Labour Practices. They evaluate the parts of member company supply chains where clothing is assembled. This is the most labour intensive part of garment supply chains, and where brands can have the most influence over working conditions.

In most apparel supply chains, clothing brands do not own product locations, and most product locations work for many different brands. This means that in most cases FWF member companies have influence, but not direct control, over working conditions. As a result, the Brand Performance Checks focus primarily on verifying the efforts of member companies. Outcomes at the product location level are assessed via audits and complaint reports, however the complexity of the supply chains means that even the best efforts of FWF member companies cannot guarantee results.

Even if outcomes at the product location level cannot be guaranteed, the importance of good management practices by member companies cannot be understated. Even one concerned customer at a product location can have significant positive impacts on a range of issues like health and safety conditions or freedom of association. And if one customer at a product location can demonstrate that improvements are possible, other customers no longer have an excuse not to act. The development and sharing of these types of best practices has long been a core part of FWF's work.

The Brand Performance Check system is designed to accommodate the range of structures and strengths that different companies have, and reflects the different ways that brands can support better working conditions.

This report is based on interviews with member company employees who play important roles in the management of supply chains, and a variety of documentation sources, financial records, supplier data. The findings from the Brand Performance Check are summarized and published at www.fairwear.org. The online [Brand Performance Check Guide](#) provides more information about the indicators.

BRAND PERFORMANCE CHECK OVERVIEW

ROOTS for Safety B.V.

Evaluation Period: 01-01-2016 to 31-12-2016

MEMBER COMPANY INFORMATION	
Headquarters:	Hoogvliet, Netherlands
Member since:	01-07-2013
Product types:	Workwear
Production in countries where FWF is active:	China, Romania
Production in other countries:	Italy, Poland
BASIC REQUIREMENTS	
Workplan and projected production location data for upcoming year have been submitted?	Yes
Actual production location data for evaluation period was submitted?	Yes
Membership fee has been paid?	Yes
SCORING OVERVIEW	
% of own production under monitoring	99%
Benchmarking score	56
Category	Good

Summary:

ROOTS for Safety has met most of FWF's performance requirements on the implementation of the Code of Labour Practices. ROOTS for Safety has monitored 99% of their supply chain, which meets FWF's required monitoring threshold of 80% for members in their third+ year of membership.

ROOTS for Safety has an in-depth production planning system in place that allows them to very accurately forecast their production orders, which supports preventing and reducing excessive overtime at their suppliers. This automated system has allowed them to reduce the amount of rushed orders placed at their suppliers over the last few years.

Over 90% of ROOTS for Safety's production is sourced in China, where they have a local office, including a Production Manager. This Production Manager and his team visit the suppliers almost weekly, including the subcontractors of their main supplier. These visits allow them to follow up on and discuss Corrective Action Plans with factory management.

In 2017, ROOTS for Safety should work on developing a system for evaluating suppliers compliance and progress on Code of Labour Practices and integrate this into its decision-making process on supplier performance. At the main supplier in China, ROOTS for Safety should work on ensuring workers are aware of the Code of Labour Practices, by encouraging this supplier to participate in a WEP training, or other training. Additionally, ROOTS for Safety should work towards a demonstrable pricing policy, including knowing the labour-minute costing of garments and the direct labour costs paid by their suppliers.

PERFORMANCE CATEGORY OVERVIEW

Leader: This category is for member companies who are doing exceptionally well, and are operating at an advanced level. Leaders show best practices in complex areas such as living wages and freedom of association.

Good: It is FWF's belief that member companies who are making a serious effort to implement the Code of Labour Practices—the vast majority of FWF member companies—are 'doing good' and deserve to be recognized as such. They are also doing more than the average clothing company, and have allowed their internal processes to be examined and publicly reported on by an independent NGO. The majority of member companies will receive a 'Good' rating.

Needs Improvement: Member companies are most likely to find themselves in this category when major unexpected problems have arisen, or if they are unable or unwilling to seriously work towards CoLP implementation. Member companies may be in this category for one year only after which they should either move up to Good, or will be moved to suspended.

Suspended: Member companies who either fail to meet one of the Basic Requirements, have had major internal changes which means membership must be put on hold for a maximum of one year, or have been in Needs Improvement for more than one year. Member companies may remain in this category for one year maximum, after which termination proceedings will come into force.

Categories are calculated based on a combination of benchmarking score and the percentage of own production under monitoring. The specific requirements for each category are outlined in the Brand Performance Check Guide.

1. PURCHASING PRACTICES

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.1a Percentage of production volume from production locations where member company buys at least 10% of production capacity.	97%	Member companies with less than 10% of a production location's production capacity generally have limited influence on production location managers to make changes.	Supplier information provided by member company.	4	4	0

Comment: ROOTS for Safety has fairly high leverage at its main supplier and a number of its smaller suppliers, which means they may have higher influence to improve working conditions at these locations.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.1b Percentage of production volume from production locations where member company buys less than 2% of its total FOB.	3%	FWF provides incentives to clothing brands to consolidate their supplier base, especially at the tail end, as much as possible, and rewards those members who have a small tail end. Shortening the tail end reduces social compliance risks and enhances the impact of efficient use of capital and remediation efforts.	Production location information as provided to FWF.	3	4	0

Comment: ROOTS for Safety has one main supplier that accounts for over 85% of its production. A few other suppliers are used to produce specialised items such as footwear, and 3% of ROOTS' total production is sourced at locations where the brand buys less than 2% of its total FOB.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.2 Percentage of production volume from production locations where a business relationship has existed for at least five years.	1%	Stable business relationships support most aspects of the Code of Labour Practices, and give production locations a reason to invest in improving working conditions.	Supplier information provided by member company.	1	4	0

Comment: During the past two years, ROOTS for Safety has moved the majority of production away from two of its long-term suppliers due to challenges with communication and quality. No new suppliers were added in 2016, however the majority of relationships with suppliers has been for less than 5 years.

Recommendation: FWF recommends the member to maintain stable business relationships with suppliers. Long term relationships support most aspects of the Code of Labour Practices, and give factories a reason to invest in improving working conditions. It is advised to describe policies regarding maintaining long term business relationship in a sourcing strategy that is agreed upon with top management/sourcing staff.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.3 All new production locations are required to sign and return the questionnaire with the Code of Labour Practices before first bulk orders are placed.	No new production locations added in past financial year	The CoLP is the foundation of all work between production locations and brands, and the first step in developing a commitment to improvements.	Signed CoLPs are on file.	N/A	2	0

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.4 Member company conducts human rights due diligence at all new production locations before placing orders.	No new production locations added in past financial year	Due diligence helps to identify, prevent and mitigate potential human rights problems at new suppliers.	Documentation may include pre-audits, existing audits, other types of risk assessments.	N/A	4	0

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.5 Production location compliance with Code of Labour Practices is evaluated in a systematic manner.	No	A systemic approach is required to integrate social compliance into normal business processes, and supports good decisionmaking.	Documentation of systemic approach: rating systems, checklists, databases, etc.	0	2	0

Comment: In 2016, ROOTS for Safety began using the ISO 9001 Quality Assessment System to assess and rate their suppliers. However this system does not currently include information on social compliance issues, such as the Code of Labour Practices, but rather looks at the quality and delivery times.

Requirement: A systematic approach is required to integrate social compliance into normal business processes, and supports good decision-making. The approach needs to ensure that ROOTS for Safety consistently evaluates the entire supplier base and includes information into decision-making procedures.

Recommendation: FWF recommends adding an assessment on compliance with Code of Labour Practices into the existing ISO 9001 system that ROOTS for Safety has in place to evaluate suppliers, to ensure it is integrated throughout supplier evaluations.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.6 The member company's production planning systems support reasonable working hours.	Strong, integrated systems in place.	Member company production planning systems can have a significant impact on the levels of excessive overtime at production locations.	Documentation of robust planning systems.	4	4	0

Comment: ROOTS for Safety has an in-depth software system in place which allows it to plan its production based on yearly trends, in-house stock and current and anticipated sales. Based on this information the Purchasing Manager places monthly orders to ensure they always have stock on hand in the anticipated styles and sizes. The lead time for most orders is six months. This system has resulted in less rush orders for ROOTS for Safety and reduced the urgency of orders placed on suppliers.

For special or unexpected orders, the Purchasing Manager works closely with the Production Manager based in China to negotiate timelines with the supplier. Because ROOTS for Safety sources mainly from one supplier in China and has a dedicated floor for their production, they are very informed of the capacity available. If they have an increase in production the supplier is often able to allocate other workers from the factory to support, to try and reduce the risk of overtime for workers. This is always negotiated and discussed with the factory directly.

The automated forecast system enhances internal communication between the sales and purchasing department of ROOTS for Safety. ROOTS for Safety feels that their system also contributes to better planning of their suppliers, which consequently reduces the risk of overtime perform by workers.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.7 Degree to which member company mitigates root causes of excessive overtime.	Intermediate efforts	Some production delays are outside of the control of member companies; however there are a number of steps that can be taken to address production delays without resorting to excessive overtime.	Evidence of how member responds to excessive overtime and strategies that help reduce the risk of excessive overtime, such as: root cause analysis, reports, correspondence with factories, etc.	3	6	0

Comment: As previously mentioned, ROOTS for Safety has a robust production planning system in place, however despite this, some indication of excessive overtime was found during an audit of their main supplier. ROOTS for Safety has discussed this with factory management who confirm that workers now only work 59.5 hours per week, which is within the legal limit of a maximum of 60, however this has not yet been verified.

Recommendation: ROOTS for Safety could continue discussing with factory management on the causes of excessive overtime and provide support to manage overtime, as well as continuing to monitor the working hours. If necessary, ROOTS for Safety could hire local experts to analyse root cause of excessive overtime in cooperation with the supplier. FWF could recommend qualified persons upon request.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.8 Member company's pricing policy allows for payment of at least the legal minimum wages in production countries.	Country-level policy	The first step towards ensuring the payment of minimum wages - and towards implementation of living wages - is to know the labour costs of garments.	Formal systems to calculate labour costs on per-product or country/city level.	2	4	0

Comment: As a technical work wear brand, ROOTS for Safety sources its own fabrics and accessories and provides these to its suppliers to produce the garments. Therefore it is aware of the price breakdown of materials, accessories and labour. Although according to ROOTS for Safety they work with labour-minute costing and an open costing system with suppliers, including knowing the direct labour costs, this could not be verified during the Brand Performance Check. ROOTS for Safety is aware of minimum wage levels in China.

Requirement: Roots for Safety needs to develop a demonstrable pricing policy where the member knows the labour cost of all products and which allows the payment of at least legal minimum wages in production countries.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.9 Member company actively responds if suppliers fail to pay legal minimum wages.	No minimum wage problems reported	If a supplier fails to pay minimum wage, FWF member companies are expected to hold management of the supplier accountable for respecting local labour law.	Complaint reports, CAPs, additional emails, FWF audit reports or other documents that show minimum wage issue is reported/resolved.	2	2	-2

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.10 Evidence of late payments to suppliers by member company.	No	Late payments to suppliers can have a negative impact on production locations and their ability to pay workers on time. Most garment workers have minimal savings, and even a brief delay in payments can cause serious problems.	Based on a complaint or audit report; review of production location and member company financial documents.	0	0	-1

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.11 Degree to which member company assesses root causes of wages lower than living wages with suppliers and takes steps towards the implementation of living wages.	Basic approach	Sustained progress towards living wages requires adjustments to member companies' policies.	Documentation of policy assessments and/or concrete progress towards living wages.	2	8	0

Comment: As part of the follow up on audits, ROOTS for Safety has discussed with suppliers the current wage levels and the ambition to work towards a living wage. ROOTS for Safety acknowledges this as the most difficult area for them to make progress on while trying to balance their own costs, but also increase wages for workers. According to ROOTS for Safety and its main supplier, workers are currently paid significantly more than minimum wage. The latest audit of this supplier does show that all workers are paid more than minimum wage, however many of the workers doing sewing, inspection, packing and helping are paid less than the industry average.

Recommendation: FWF encourages ROOTS for Safety to assess the hypothetical cost effects of increasing wages towards benchmarks that are included in the wage ladder. To support companies in this process FWF has developed a calculation model that estimates the effect on FOB and retail prices under different pricing models. FWF also recommends discussing the wage ladder from the most recent audit with ROOTS for Safety's main supplier, to ensure they understand the different level of wages and industry averages.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
1.12 Percentage of production volume from factories owned by the member company (bonus indicator).	None	Owning a supplier increases the accountability and reduces the risk of unexpected CoLP violations. Given these advantages, this is a bonus indicator. Extra points are possible, but the indicator will not negatively affect an member company's score.	Supplier information provided by member company.	N/A	2	0

PURCHASING PRACTICES

Possible Points: 38

Earned Points: 21

2. MONITORING AND REMEDIATION

BASIC MEASUREMENTS	RESULT	COMMENTS
% of own production under standard monitoring (excluding low-risk countries)	91%	
% of production volume where monitoring requirements for low-risk countries are fulfilled	8%	FWF low risk policy should be implemented. 0 = policy is not implemented correctly. N/A = no production in low risk countries.
Meets monitoring requirements for tail-end production locations.	No	Implementation will be assessed next Brand Performance Check
Total of own production under monitoring	99%	Minimums: 1 year: 40%; 2 years 60%; 3 years+: 80-100% Measured as a percentage of turnover.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.1 Specific staff person is designated to follow up on problems identified by monitoring system	Yes	Followup is a serious part of FWF membership, and cannot be successfully managed on an ad-hoc basis.	Manuals, emails, etc., demonstrating who the designated staff person is.	2	2	-2

Comment: The QHSE & CSR Manager is responsible for ensuring follow up and remediation of problems identified through monitoring.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.2 Quality of own auditing system meets FWF standards.	Member makes use of FWF audits and/or external audits only	In case FWF teams cannot be used, the member companies' own auditing system must ensure sufficient quality in order for FWF to approve the auditing system.	Information on audit methodology.	N/A	0	-1

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.3 Audit Report and Corrective Action Plan (CAP) findings are shared with factory and worker representation where applicable. Improvement timelines are established in a timely manner.	Yes	2 part indicator: FWF audit reports were shared and discussed with suppliers within two months of audit receipt AND a reasonable time frame was specified for resolving findings.	Corrective Action Plans, emails; findings of followup audits; brand representative present during audit exit meeting, etc.	2	2	-1

Comment: Audit reports and CAP findings are shared with suppliers in a timely manner.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.4 Degree of progress towards resolution of existing Corrective Action Plans and remediation of identified problems.	Basic	FWF considers efforts to resolve CAPs to be one of the most important things that member companies can do towards improving working conditions.	CAP-related documentation including status of findings, documentation of remediation and follow up actions taken by member. Reports of quality assessments. Evidence of understanding relevant issues.	4	8	-2

Comment: ROOTS for Safety has documented the progress of resolving current Corrective Action Plans systematically and can provide pictures of improvements for some of the factory-level issues. ROOTS for Safety staff regularly visit the main suppliers and have conversations during these visits encouraging the factory to remediate ongoing problems. The improvements are not yet verified by a FWF audit team.

Recommendation: ROOTS for Safety could request support from FWF on a training to follow up on Corrective Action Plans. After the training, the local Production Manager of ROOTS for Safety would be able to conduct follow up visits to factories.

In addition, ROOTS for Safety could also request FWF's local staff to conduct monitoring visits on behalf of the brand. During the monitoring visit, the status of the corrective action plans are checked.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.5 Percentage of production volume from production locations that have been visited by the member company in the previous financial year.	93%	Formal audits should be augmented by annual visits by member company staff or local representatives. They reinforce to production location managers that member companies are serious about implementing the Code of Labour Practices.	Member companies should document all production location visits with at least the date and name of the visitor.	4	4	0

Comment: All of the production locations and subcontractors in China are visited regularly (at least once per month) by the production team based there. One of the suppliers based in Europe was also visited in 2016, although the largest European supplier was not. At one supplier in Romania where the upper soles of shoes are made, the location has never been visited by ROOTS for Safety and the value of FOB made there has not been disclosed by the supplier.

Recommendation: Annual visits should be made for production sites (including subcontractors and production locations in low-risk countries). Regular visits provide the opportunities to discuss problems and corrective actions in the time period between formal audits.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.6 Existing audit reports from other sources are collected.	No existing reports/all audits by FWF or FWF member company	Existing reports form a basis for understanding the issues and strengths of a supplier, and reduces duplicative work.	Audit reports are on file; evidence of followup on prior CAPs. Reports of quality assessments.	N/A	3	0

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.7 Compliance with FWF risk policies.	None of the specific risk policies apply	Aside from regular monitoring and remediation requirements under FWF membership, countries, specific areas within countries or specific product groups may pose specific risks that require additional steps to address and remediate those risks. FWF requires member companies to be aware of those risks and implement policy requirements as prescribed by FWF.	Policy documents, inspection reports, evidence of cooperation with other customers sourcing at the same factories, reports of meetings with suppliers, reports of additional activities and/or attendance lists as mentioned in policy documents.	N/A	6	-2
Compliance with FWF enhanced monitoring programme Bangladesh	Policies are not relevant to the company's supply chain			N/A	6	-2
Compliance with FWF Myanmar policy	Policies are not relevant to the company's supply chain			N/A	6	-2
Compliance with FWF guidance on abrasive blasting	Policies are not relevant to the company's supply chain			N/A	6	-2

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.8 Member company cooperates with other FWF member companies in resolving corrective actions at shared suppliers.	No CAPs active, no shared production locations or refusal of other company to cooperate	Cooperation between customers increases leverage and chances of successful outcomes. Cooperation also reduces the chances of a factory having to conduct multiple Corrective Action Plans about the same issue with multiple customers.	Shared CAPs, evidence of cooperation with other customers.	N/A	2	-1

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.9 Percentage of production volume where monitoring requirements for low-risk countries are fulfilled.	50-100%	Low-risk countries are determined by the presence and proper functioning of institutions which can guarantee compliance with national and international standards and laws.	Documentation of visits, notification of suppliers of FWF membership; posting of worker information sheets, completed questionnaires.	1	2	0

Comment: ROOTS for Safety works with two suppliers in low-risk countries, both of whom have been made aware of FWF membership, returned the questionnaire and have posted the CoLP.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.10 Extra bonus indicator: in case FWF member company conducts full audits above the minimum required monitoring threshold.	None	FWF encourages all of its members to audit/monitor 100% of its production locations and rewards those members who conduct full audits above the minimum required monitoring threshold.	Production location information as provided to FWF and recent Audit Reports.	N/A	3	0

Comment: Although ROOTS for Safety has monitored 99% of its supply chain, it does not meet the tail-end requirements of FWF membership, as it has not audited one of its supplier with whom it has 75% leverage.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.11 Questionnaire is sent and information is collected from external brands resold by the member company.	No external brands resold	FWF believes it is important for affiliates that have a retail/wholesale arm to at least know if the brands they resell are members of FWF or a similar organisation, and in which countries those brands produce goods.	Questionnaires are on file.	N/A	2	0

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.12 External brands resold by member companies that are members of another credible initiative (% of external sales volume).	No external brands resold	FWF believes members who resell products should be rewarded for choosing to sell external brands who also take their supply chain responsibilities seriously and are open about in which countries they produce goods.	External production data in FWF's information management system. Documentation of sales volumes of products made by FWF or FLA members.	N/A	3	0

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
2.13 Questionnaire is sent and information is collected from licensees.	No licensees	FWF believes it is important for member companies to know if the licensee is committed to the implementation of the same labour standards and has a monitoring system in place.	Questionnaires are on file. Contracts with licensees.	N/A	1	0

MONITORING AND REMEDIATION

Possible Points: 18

Earned Points: 13

Additional comments on Monitoring and Remediation:

Requirement: In the tail end of ROOTS for Safety's supplier base, FWF requires ROOTS for Safety to ensure it audits all production locations that are responsible for over 2% of ROOTS for Safety's production volume and production locations where ROOTS for Safety is responsible for over 10% of the location's production capacity.

3. COMPLAINTS HANDLING

BASIC MEASUREMENTS	RESULT	COMMENTS
Number of worker complaints received since last check	0	At this point, FWF considers a high number of complaints as a positive indicator, as it shows that workers are aware of and making use of the complaints system.
Number of worker complaints in process of being resolved	0	
Number of worker complaints resolved since last check	0	

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
3.1 A specific employee has been designated to address worker complaints	Yes	Followup is a serious part of FWF membership, and cannot be successfully managed on an ad-hoc basis.	Manuals, emails, etc., demonstrating who the designated staff person is.	1	1	-1

Comment: The QHSE & CSR manager is responsible for addressing worker complaints.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
3.2 System is in place to check that the Worker Information Sheet is posted in factories.	Yes	The Worker Information Sheet is a key first step in alerting workers to their rights.	Photos by company staff, audit reports, checklists from production location visits, etc.	2	2	0

Comment: In China, ROOTS for Safety staff regularly visit the factories (at least weekly), where part of their visit consists of checking that the Worker Information Sheet is posted. Photos are taken and shared with the head office and status updates are confirmed in the Corrective Action Plans.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
3.3 Percentage of FWF-audited production locations where at least half of workers are aware of the FWF worker helpline.	33%	The FWF complaints procedure is a crucial element of verification. If production location based complaint systems do not exist or do not work, the FWF worker helpline allows workers to ask questions about their rights and file complaints. Production location participation in the Workplace Education Programme also count towards this indicator.	Percentage of audited production locations where at least 50% of interviewed workers indicate awareness of the FWF complaints mechanism + percentage of production locations in WEP programme.	2	4	0

Comment: At some suppliers, including ROOTS for Safety's main supplier in China, workers are still not aware of the FWF worker helpline, despite the Worker Information Sheet being posted. Factory management has said they will train and inform staff on the FWF CoLP, but this has not yet happened.

Recommendation: ROOTS for Safety can stimulate its suppliers, particularly its main supplier in China, to participate in WEP trainings, to raise awareness about the existence and the functioning of FWF's worker hotline. In addition to sending the worker information sheet, ROOTS for Safety can use the worker information cards available for download on FWF's website.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
3.4 All complaints received from production location workers are addressed in accordance with the FWF Complaints Procedure	No complaints received	Providing access to remedy when problems arise is a key element of responsible supply chain management. Member company involvement is often essential to resolving issues.	Documentation that member company has completed all required steps in the complaints handling process.	N/A	6	-2

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
3.5 Cooperation with other customers in addressing worker complaints at shared suppliers	No complaints or cooperation not possible / necessary	Because most production locations supply several customers with products, involvement of other customers by the FWF member company can be critical in resolving a complaint at a supplier.	Documentation of joint efforts, e.g. emails, sharing of complaint data, etc.	N/A	2	0

COMPLAINTS HANDLING

Possible Points: 7

Earned Points: 5

4. TRAINING AND CAPACITY BUILDING

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
4.1 All staff at member company are made aware of FWF membership.	Yes	Preventing and remediating problems often requires the involvement of many different departments; making all staff aware of FWF membership requirements helps to support cross-departmental collaboration when needed.	Emails, trainings, presentation, newsletters, etc.	1	1	-1

Comment: ROOTS for Safety holds quarterly meetings with all staff where they include time to discuss FWF and any news or changes.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
4.2 All staff in direct contact with suppliers are informed of FWF requirements.	Yes	Sourcing, purchasing and CSR staff at a minimum should possess the knowledge necessary to implement FWF requirements and advocate for change within their organisations.	FWF Seminars or equivalent trainings provided; presentations, curricula, etc.	2	2	-1

Comment: The QHSE & CSR Manager has attended FWF Annual Conference and participated in the Dutch workwear meeting held in December 2016, where many FWF requirements were discussed. Other staff members who are in direct contact with suppliers have also been informed of FWF requirements by the QHSE & CSR Manager. The Production Manager who is most directly in contact with suppliers is aware of FWF requirements but has not attended any FWF training.

Recommendation: FWF encourages the Production Manager to observe factory audits by FWF audit teams to learn about the audit process and to be able to better follow up on corrective action plans.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
4.3 All sourcing contractors/agents are informed about FWF's Code of Labour Practices.	Member does not use agents/contractors	Agents have the potential to either support or disrupt CoLP implementation. It is the responsibility of member company to ensure agents actively support the implementation of the CoLP.	Correspondence with agents, trainings for agents, FWF audit findings.	N/A	2	0

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
4.4 Production location participation in Workplace Education Programme (where WEP is offered; by production volume)	0%	Lack of knowledge and skills on best practices related to labour standards is a common issue in production locations. Good quality training of workers and managers is a key step towards sustainable improvements.	Documentation of relevant trainings; participation in Workplace Education Programme.	0	6	0

Comment: A WEP Training was held at one of ROOTS for Safety's suppliers in 2014, however ROOTS for Safety has moved the majority of production away from that location now.

Requirement: Manufacturers and their workers should be systematically informed about FWF and the implementation of the Code of Labour Practices. All factory management and workers should be informed and aware about the relevant labour standards and grievance mechanisms.

Recommendation: ROOTS for Safety could invite also subcontractors to join the Workplace Education Programme in China.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
4.5 Production location participation in trainings (where WEP is not offered; by production volume)	All production is in WEP areas.	In areas where the Workplace Education Programme is not yet offered, member companies may arrange trainings on their own or work with other training-partners. Trainings must meet FWF quality standards to receive credit for this indicator.	Curricula, other documentation of training content, participation and outcomes.	N/A	4	0

TRAINING AND CAPACITY BUILDING

Possible Points: 9

Earned Points: 3

5. INFORMATION MANAGEMENT

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
5.1 Level of effort to identify all production locations	Intermediate	Any improvements to supply chains require member companies to first know all of their production locations.	Supplier information provided by member company. Financial records of previous financial year. Documented efforts by member company to update supplier information from its monitoring activities.	3	6	-2

Comment: ROOTS for Safety has made steps to ensure it knows all of its production locations and when a new location was found they followed up with an audit of the location. Despite efforts, ROOTS for Safety still does not have information about its subcontractor in Romania, and has never visited.

Requirement: Brands need to know where their products are actually made before they are able to assess human rights risks or support improvements. After the end of each financial year, ROOTS for Safety must confirm their list of suppliers and provide relevant financial data. A complete suppliers list means ALL suppliers are included. The relevant information for their supplier in Romania is required.

Recommendation: If ROOTS for Safety's supplier in Romania is unwilling to disclose its production location and FOB, ROOTS for Safety should consider the human rights risks that may be present and consider changing their sourcing strategy with this supplier. Without transparency from suppliers, ROOTS for Safety is unable to support improvements and are open to large human rights risks in their supply chain.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
5.2 CSR and other relevant staff actively share information with each other about working conditions at production locations.	Yes	CSR, purchasing and other staff who interact with suppliers need to be able to share information in order to establish a coherent and effective strategy for improvements.	Internal information system; status CAPs, reports of meetings of purchasing/CSR; systematic way of storing information.	1	1	-1

Earned Points: 4

6. TRANSPARENCY

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
6.1 Degree of member company compliance with FWF Communications Policy.	Minimum communications requirements are met AND no significant problems found	FWF's communications policy exists to ensure transparency for consumers and stakeholders, and to ensure that member communications about FWF are accurate. Members will be held accountable for their own communications as well as the communications behaviour of 3rd-party retailers, resellers and customers.	FWF membership is communicated on member's website; other communications in line with FWF communications policy.	2	2	-3

Comment: ROOTS for Safety communicated accurately about FWF membership through its catalogue, as well as on its website.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
6.2 Member company engages in advanced reporting activities	No	Good reporting by members helps to ensure the transparency of FWF's work and shares best practices with the industry.	Member company publishes one or more of the following on their website: Brand Performance Check, Audit Reports, Supplier List.	0	2	0

Comment: ROOTS for Safety experienced problems with their website in 2016, meaning they were unable to publish their latest Performance Check online. Performance Checks from previous year are published on their website.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
6.3 Social Report is submitted to FWF and is published on member company's website	Complete and accurate report submitted to FWF	The social report is an important tool for members to transparently share their efforts with stakeholders. Member companies should not make any claims in their social report that do not correspond with FWF's communication policy.	Social report that is in line with FWF's communication policy.	1	2	-1

Comment: ROOTS for Safety has submitted its Social Report to FWF. Currently it is unable to publish the report due to problems with its website, but intends to publish the report when possible. Previous years reports are available online.

7. EVALUATION

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
7.1 Systemic annual evaluation of FWF membership is conducted with involvement of top management	Yes	An annual evaluation involving top management ensures that FWF policies are integrated into the structure of the company.	Meeting minutes, verbal reporting, Powerpoints, etc.	2	2	0

Comment: The Managing Director of ROOTS for Safety discusses FWF's membership with the CSR team at least once a year.

PERFORMANCE INDICATORS	RESULT	RELEVANCE OF INDICATOR	DOCUMENTATION	SCORE	MAX	MIN
7.2 Level of action/progress made on required changes from previous Brand Performance Check implemented by member company.	N/A	In each Brand Performance Check report, FWF may include requirements for changes to management practices. Progress on achieving these requirements is an important part of FWF membership and its process approach.	Member company should show documentation related to the specific requirements made in the previous Brand Performance Check.	N/A	4	-2

Comment: In 2015 ROOTS for Safety had six requirements. It followed up on the following:

- Invited suppliers to join FWF's Workplace Education Programme (but unfortunately none did so in 2016)
- Take photos of the Worker Information Sheet posted in the factory in Italy
- Ensure that the Worker Information Sheet is posted in all production locations
- Organise an audit at the new production location in China and inform FWF of all related production sites

The following requirements were not followed up on and have been included again in this report:

- A systematic approach is required to integrate social compliance into normal business processes, and supports good decision-making. The approach needs to ensure that Roots for safety consistently evaluates the entire supplier base and includes information into decision-making procedures.
- Roots for Safety needs to develop a pricing policy where the member knows the labour cost of all products and which allows the payment of at least legal minimum wages in production countries.

Requirement: It is required to work towards remediation of previous requirements from the last Brand Performance Check. Further engagement needs to be taken with regard to the following requirements mentioned in the last Brand Performance Check.
